Handwritten text, mostly illegible due to fading.

Faint, illegible text, possibly a title or description.

(S) The Table of Streets and Distances here submitted, has been prepared with great care, and it is believed will be found useful to all classes of our citizens, as well as strangers. To cartmen, hackmen, and persons employing them, it will be found eminently serviceable, enabling them to determine with accuracy the distance travelled, and the correctness of the charges therefor. The distances are given in hundredths of a mile, which is as small a fraction as could be accurately measured, and are confidently believed to give the true measurement in every case, within fifty feet, which is as near as is necessary for all general purposes.
